She was always far away
Got this dream it hurts today
Tried to keep 'em all in place
Get so close from breaking down
This whole town
I waited won't you come around

What happened to mama What happened to mama The world move away What happened to mama What happened to mama The world move away

Have you taken a new form

Are you the brother I don't know

Deep bright eyes what do they show

I just feel the strongest pull

Does it make sense, is it true

Left not knowing what to do

What happened to mama What happened to mama The world move away What happened to mama What happened to mama The world move away

Got so high Burn my eyes On my trial Is it time

I get anxious
I go nuts
Plenty of times when it's too much
Leaning in to get a touch
We don't wanna set it straight
No conclusions it's too late
It's not the same
What says fake

What happened to mama What happened to mama The world move away What happened to mama What happened to mama The world move away

Take my hand Understand Hold my hand It's my man It's my man It's my man
