

# Kill the Messenger

## Jack's Mannequin

Oh my God, this hurts like hell  
I had that dream again where  
I was lost for good in outer space  
Tell me, doctor, how to shake  
A waking nightmare that is only  
Worse when I am sleeping

Kill the messenger  
I swear it's not me  
It's just someone I used to know  
And get to church cause you're a good girl  
And he never told you that  
And all I need from you  
Could be the thing that  
Leaves us both up here forever  
I'm gonna send a little rain your way  
I'm gonna send a little rain...

It's not so easy, caving in  
I walked by your apartment twice today  
While you were gone at work  
And all the colors got so down  
It's not as cold out here  
But come quick, I am losing feeling

Kill the messenger  
I swear it's not me  
It's just someone I used to know  
And get to church cause you're a good girl  
And he never told you that  
And all I need from you  
Could be the thing that  
Leaves us both up here forever  
I'm gonna send a little rain your way  
I'm gonna send a little rain, send a little rain

I'm gonna send a little rain to pour down on you  
Rain that makes the flowers bloom  
Rain to leave you all alone  
That keeps eyelashes falling  
And wishes washed away

Kill the messenger  
I swear it's not me  
It's just someone I used to know  
And get to church cause you're a good girl  
And he never told you that  
And all I need from you  
Could be the thing that  
Leaves us both up here forever  
I'm gonna send a little rain your way  
I'm gonna send a little rain...  
I'm gonna send a little rain your way
