

Live And Let Die

Jaded Heart

(...Too late to live and let die, We're not the holy fighters
But we can start to live like friends)

It's a lousy day, Out on dead line
With the horrors of cold, and you never see a smile
They will be taking out to defend their lands
Without a clue about the reasons why
Tell me why, Tell me why now

Sargents die, and soldiers bleed
For the written honour on the savely grace
They sleep at night, man it's a war
Oh, Again turn game from the masters to their slaves

We don't need to take no pressure (We don't need to take no)
Stop to fight, Stop to realize

It's now
Too late to live and let die, We're not the holy fighters
But we can start to live like friends (We can start to live like friends)
It's time to change the script
Everyone's a rider
Let's build in peace, a remedy

For the one who were in the street
For the devils you had won and you survived
But you can't stay, you can't stay waiting
For the bullet you will carry within your life

No president can drag you under (No president)
No president, We're not alone
You need to find a friend

It's now
Too late to live and let die, We're not the holy fighters
But we can start to live like friends (We can start to live like friends)
It's time to change the script
Everyone's a rider
Let's build in peace a remedy

It's now
Too late to live and let die, We're not the holy fighters
But we can start to live like friends (We can start to live like friends)
It's time to change the script
Everyone's a rider
Let's build in peace a remedy

Too late
