

When our fears have all ended the tears spent and done  
When the skies shed no more light  
Comes the setting of the sun

Fly on, soar above it all  
Fly far beyond the sun

In union we are brothers in union stand as one  
In union as all of us in union we are one

Danger's rounding every corner  
Fear splitting every son  
When we face another adversary?  
We will do what needs be done

Fly on, soar above it all  
Fly far beyond the sun

In union we are brothers in union stand as one  
In union as all of us in union we are one

In union we are brothers in union stand as one  
In union as all of us in union we are one

Now together we forge a new world far better than before  
No longer fall for anything  
We will rise in strength once more

Fly on, soar above it all  
Fly far beyond the sun

In union we are brothers in union stand as one  
In union as all of us in union we are one
