

# Out In The Cold

Jagged Edge

Somewhere in that sacred heart  
My name's written in blood  
My hand will always touch your skin  
There's a picture of me in your immaculate eyes

You can always run run run  
I won't behind you  
You can always try  
You know I'm inside you

You left me standing alone in the cold  
I still want you back with me  
You left me standing alone  
Out in the cold

Wakin' up with a lonely heart  
I spend my days wishing for you  
There's a secret bond between us  
I know you'll come coming back to me  
Baby

You can always run run run  
I won't behind you  
You can always try  
You know I'm inside you

You left me standing alone in the cold  
I still want you back with me  
You left me standing alone  
Out in the cold
