

# Long Night with You

Jake Owen

Tryin' to keep that wolf at bay  
Twelve out of twenty-four hours a day  
I'm bustin' it, I'm breakin' my back

Swing that hammer, stomp that shovel  
Boss man says, "Boy, you're pullin' a double"  
It's always me, pickin' up the slack  
Nobody said it was easy

But girl it's been a long hard day  
It seems we work our lives away  
Five o'clock I'm beat, dead on these two feet

But girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight 'cause all that gets me through  
After a long day is a long night with you

One of those nights when we don't sleep  
The two of us fittin' like a puzzle piece  
Turnin' up the heat with the lights down low

So go ahead honey and pour the wine  
I'm a little overdue for some overtime  
In your lovin' arms, I ain't lettin' you go  
Yet at night we'll take it slow an' easy

'Cause girl it's been a long hard day  
It seems we work our lives away  
Five o'clock I'm beat, dead on these two feet

But girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight, 'cause all that gets me through  
After a long day is a long night with you

Girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight, 'cause all that gets me through  
After a long day is a long night  
Girl, it's been a long day and I'll need a long night with you

Just a little bit longer baby  
Just a little bit longer with you
