Move Together

Home now, end of the night And it's colder to turn on your side And I know you are up in two hours But we didn't get tonight, we don't have tomorrow So don't ruin now

How we gonna move together? Just come closer If we don't move together Come closer How we gonna breathe? How we gonna be together? Just keeping the peace between the sheets

And I creep in and everything's loud And I'm sorry, I've woken you now And we'll argue, the tiniest thing But we didn't get tonight, don't have tomorrow So I'm done whispering, done whispering

How we gonna move together? Just come closer If we don't move together Come closer How we gonna breathe? How we gonna be together? Just keeping the peace between the sheets

So maybe don't give me cold, cold shoulder Before you go, turn around and let me hold you And let me say in the dark of the morning Just one more thing

How we gonna move together? Just come closer If we don't move together Come closer How we gonna breathe? How we gonna be together? Just keeping the peace Just keeping the peace Just keeping the peace between the sheets
