

# Sparks

James Bay

If I told you about my favourite dream  
The one without you  
Would you spit fire at me?  
Or would you burn to know  
Every single by blow  
I don't know her  
Maybe she isn't real  
She didn't hold back  
When you were lying next to me

This can't be all we are  
Silent and in the dark

We could be making sparks  
But we don't ignite, don't ignite  
We could be making sparks  
But we need to fight, need to fight

Come a little closer  
Remember when we used to sway  
Trembling in the covers  
Taking it with an only grey

This can't be all we are  
Silent and in the dark

We could be making sparks  
But we don't ignite, don't ignite  
We could be making sparks  
But we need to fight, need to fight

No I never saw the walls  
Falling on us like this  
Now I'm hanging from a rope  
Holding my hope, my hope  
I don't need it  
I just want it more than anything else  
I can do this alone

No, no  
We could be making sparks  
But we don't ignite, don't ignite

We could be making sparks  
But we don't ignite, don't ignite  
We could be making sparks  
But we need to fight, need to fight
