

# Still A Long Way To Go

James Dean Bradfield

You're falling through the night  
And giving in to bad dreams  
Where nothing is as it seems  
There's still a long way to go

And the fading glorious night  
Never seems to bring you home  
You think that this is your road  
There's still a long way to go

I can't give you an A to Z  
There's some things I just can't show  
Just try to disbelieve your eyes  
For this I surely know  
There's a long way to go

Like laughing in the dark  
To keep the dogs at bay  
No matter what you might say  
There's still a long way to go

Cold comfort in the dawn  
The dawn that brings you round  
A pale light that you've found  
There's still a long way to go

I can't give you an A to Z  
There's some things I just can't show  
Just try to disbelieve your eyes  
For this I surely know

There's a long way to go

You're falling through the night  
And giving in to bad dreams  
Where nothing is as it seems  
There's still a long way to go
