

Sound Of Love

James Iha

The sound of love is oceans far away
And I can love and I can check your faith
The sound that beckons me is from your heart
And I can't begin to say cause I don't really know
Just where I've been every desire my heart gives in

Your love it takes a little faith in
And I know I have to wait my own good time, yes
Your love it takes a little faith in
And I know that we can make it all work out

I found you lost and longing, a troubled past
Let's begin again cause she's not going to last
Before this day is done every desire under the sun

And I know that we can make it all work out

In the daylight love seems to come and go
No more indecision, no more heartfelt division
I've seen a vision

The sound of love is passing as cities decay
People always searching a lonely disease
Overrunning run right to me babe
I swear that this love is strong
It's going to carry me, and over this dream, and every
desire

Your love it takes a little faith in
And I know I have to wait my own good time, yes
Your love I know I can't escape it
And I know that we can make it all work out

No more indecision, no more heartfelt division
I've seen a vision
