

Day In The Sun

James Reyne

You took a little white cloud
And you're fixing up your silver lining
You took a little black car
And drove it all the way
Your conversation
It's so confiding
And we could talk about tomorrow
'Cause we got a little time today

I know natures calling
Go under
I know natures calling
Summon her

Go have your day in the sun
Go have your day in the sun
I know your reasons boy
Go have your day in the sun

Does the light illuminate you
Or is it blinding
Well you should go and celebrate
The best time you ever had
Could be a corduroy road
Along the path you're finding
And all your battles will be happy
'Though some of them songs are sad

I hear strangers calling
Don't go under
I hear strangers calling
Run for cover

I know natures calling
Go under
I know natures calling
Summon her

God bids you goodnight
God's holding you tight
God's leaving the light on overnight
God's walking away
He's got nothing to say
God's leaving the light on
Every day

Go have your day in the sun
God bids you goodnight
Go have your day in the sun
God's holding you tight
God's leaving the light on overnight
Go have your day in the sun
God's walking away
Go have your day in the sun
He's got nothing to say
God's leaving the light on
Every day

Go have your day in the sun
God bids you goodnight
Go have your day in the sun
God's holding you tight
