

# It Was Me

Jamey Johnson

The first time I met her, she walked right up to me  
And said, "You're who I've wanted to find"  
There was a man she had seen in her dreams  
And it was me

She said, "I can't believe it 'cause I've never been in here  
And I've passed this place so many times"  
It was her night to find destiny  
And it was me

And we danced every song that they played  
And talked until closin' time  
The closer I held he  
The more I knew her destiny, wasn't that far from mine

The I saw a reflection of someone unfamiliar  
Lookin' back when I looked in her eyes  
The happiest man I'd ever seen  
And it was me

And we danced every song that they played  
And talked until closin' time  
The closer I held her  
The more I knew her destiny, wasn't that far from mine

She wasn't lookin', and I wasn't lookin'  
Ain't it funny that that's when love was found  
She still calls it her lucky night  
Yeah, someone was lucky, she's right

But it was me  
Ah, it was me
