

You See My Light

Jamie Lidell

You see what shines in me
You see what shines
You see the light in me
You see the light

It runs right through me
Right through my hands
So I can see me
Oh I understand

But you see my light
And you see my light

What I see is darkness
What you see is my core
When you see my darkness go
You see me whole

What I thought was empty
You all to war
You see so much in me
When I see nothing left at all

And I feel lift in me with an open hand
And I ought to trust my soul with your open hand
And in this moment I understand
In this moment I truly learn of the hand
How much I love you
