London Town

Jamie Scott

One child tries to do the best he can Lay down takes it all in his hand A fever's running high, it's out of control My shoes are waiting by the old oak door I'm changing lanes, gonna run away where the city lights won't blind my face anymor е I'm going to London town can you hear me Just give me all you've got my girl Here I am I want to leave before you run me dry I walk down Dover Street with the blood in my veins A cold breeze chills my brain when I remember things A fever's in the mist right ahead of me But the lights are kinder here and it's a guiding street I'm changing lanes, gonna run away where the city lights won't blind my face anymor е I'm changing worlds, gonna run away where the city lights won't blind my eyes anymor е Had to leave before you run me dry I'm changing lanes, gonna run away where the city lights won't blind my eyes anymor е Going to London town, can you hear me just give me all you got my girl Here I am I'm changing worlds, gonna run away where the city lights won't blind my face anymor е Going to London town, can you hear me just give me all you got my girl I'm sure I had to leave before you run my dry
