

Robots

Jamie Woon

How long before the end of the hour
How long before the people have power
How long until the end of the week?
How long before they all fall asleep -

How long before my minutes all fade (not sure about that line!)
How long before we all look the same?
How long until the end of the year,
How long before they all disappear?

How long?
How long?

How long before the end of the fear

How long before it all ends in tears
How long before it crumbles and falls -
How long before there's nothing at all?

How long?
How long?

How long before the robots attack
How long before the angels fight back?
How long before the **** hits the fan
How long before we all fall down?

How long?
How long?
