

# Automaton

Jamiroquai

Am I love?  
Every heart is beatin'  
I'm all love  
Uh-can't you feel the feelin'?  
Take my hand  
Cold like a junkie  
I'm an ice-cold man  
I'm an ice-cold man  
Why am I cryin' for you?

All this love I've felt for you  
Has gone away to another place  
(It's a digital life)  
I put my faith in a digital world  
But they're giving me eyes without a face  
I'd steal the moon on silver lights  
Remind myself I am someone  
My soul is numb and for tonight  
(I'm automaton)

I'm so tough  
Uh-can't you see me runnin'?  
See, I can touch  
Can you feel me comin'?  
I see the world  
And cry for freedom  
These metal eyes, they can't disguise  
The fact that I need something to believe in  
But then I'm dying for you

I said goodbye to the world I knew  
And took off into inner space  
(It's a digital life)  
Weren't you the ones who promised me  
A very different place?  
I've powered up, get my program set  
And tilt my head toward the sun.  
Inside I know, I'm not a void  
(I'm automaton)

Automaton (x4)

Hey, you got me down underground  
Gettin' holed up in my cyber lounge  
As if I had time to break that down  
(Automaton)  
Whatever you can do I can overwrite it  
Got a million ways to synthesize it  
Digital android, I can fight it  
(Fi-fi-fi-fight it out)

Automaton (It's a digital life)  
Automaton (Digital life)  
Automaton (A digital life)  
Automaton

Feel like a man, who fell to Earth

That this is not where I belong  
They rule my life from a metal box that's windowless  
And I wonder where it all goes wrong  
Maybe this dream will stay alive  
But can the madness be undone?  
Am I the new intelligence?

I'm automaton (x7)  
It's a digital life (x2)

You know I need something  
I can hold onto, hold onto  
(You were all I knew)  
I need something  
I can hold onto, hold onto  
This was all I knew)  
(I'm Automaton)
