# Rock Dust Light Star

**Jamiroquai**

Baby rock dust light star
Yeah, ok, that's the one

Rock Dust Light Star
And it's coming at you baby

I'm a man on the moon
I hope I don't come back too soon
Am I the only one to see the light?
No use in gettin' down upon your knees tonight

So I don't feel love
Because I got no faith
I've seen those twisted lies thrown back into my face
I've heard the crazy doctrines of the human race
I must be alone

How could it be?
Your gift to me
Salvo off heavy artillery
There's nothing 'bout your war
you can call it what you like

I know where I'm from
And it's cold and dark,
'Cos all the sinners are just saints without sparks
I'm having trouble telling them apart
Oh yeah

Comin' at you rock dust light star
Coming at you baby,
Thirty six thousand miles an hour
Rock dust light star
Comin' at you baby
What you made of what you are

Now look and see
Those stars for you and me
Waiting like slient killers in the night
Atomic legions, you can never fight (can neva fight)

I've never felt
I ever prayed
Don't have to join in with the other slaves
I'm not the only one who feels betrayed
yeahhhhhhh

See the more I think about it
I'm going against the grain
ohhhhh ohhhhh
I won't be born again
Salvation's coming from on high

(Coming at you baby, through the sky. From on high yeah.)

Rock dust light star
Coming at you baby

Thirty six thousand miles an hour
Rock dust light star
Coming at you baby
What you made of what you are
Rock dust light star
Coming at you baby
Thirty six thousand miles an hour
Rock dust light star
Coming at you baby
What you made of what you are

Rock dust light. Star.
Rock dust light. Star.

I'm a square peg
In a round hole
Maybe there's no place left for my wounded soul
Maybe the King of Kings has finally lost control of it

Rock dust light star
Coming at you baby
Thirty six thousand miles an hour

Salvation's coming
Coming at you baby
Thirty six thousand miles an hour

Salvation's coming
Coming at you baby
Thirty six thousand miles an hour
What you made of what you are

Look up and see those skies for you and me
Look up and see
