

Never get the chance to dip so far inside your mind  
But I know you'll believe me  
I never get the chance to do the things I really like  
Instead you always tease me  
I'm thinking all the time I used to wanna be with you  
But now that things are changing  
Somehow you can make me red than you make me blue  
You see what I've been facing  
Some people find a way to do it  
Some people really find a way to choose it  
I've been thinking

Girl, you know I wanna get it through  
Gonna keep the flow  
I don't need no vitamin  
Get some funk and love in your life, girl  
Is this what sweet lovers have to choose?  
Gonna keep the flow  
I don't need no vitamin

I'm thinking all the time I used to wanna be with you  
But I know now it ain't workin'  
I'm talking to the birds and bees about it and they all agree  
They can see I'm hurtin'  
I've got, telepathic, instamatic  
Memories of you that I've been keeping  
I don't need no vitamin  
Don't blink, baby, 'til I'm gone

(Are you listening? All you listen in, are you listening?)  
Girl, you know I wanna get it through  
Gonna keep the flow  
I don't need no vitamin  
Get some funk and love in your life, girl  
Is this what sweet lovers have to choose  
Gonna keep the flow  
I don't need no vitamin  
Get some funk and love in your life, girl

Girl, you know I wanna get it through  
Gonna keep the flow  
Get some funk and love in your life, girl  
Girl, you know I wanna get it through  
I don't need no vitamin  
You've got that magic touch  
You've got that magic touch  
You've got that magic touch  
You've got that magic touch  
You've got that magic touch  
You've got that magic touch
