

## Best Mistake

JamisonParker

I chronicled the days you made me want to live  
Memorize the way that it felt and then I turned it into this ki  
ss  
Tonight I'm wearing my best smile and hope to make me worth you  
r while  
I'll be the best mistake you'll ever make

From the lack of sleep and the bloodshot eyes  
To the nervous kiss and the butterflies  
Does this make any sense at all  
She said, she said

We're not sleeping, and I'm not breathing  
If this means anything at all  
I won't let you leave me anymore

If this holds insignificance, I'll have the hearse follow the a  
mbulance  
No medicine exists to make my lungs work again

Let's shake and burn, like an addict  
My hearings dead, only static  
If I said your smiles all that mattered  
Would you save my life

We're not sleeping, and I'm not breathing  
If this means anything at all  
Don't let me leave you anymore  
[4x]

Don't let me leave you anymore
