Best Mistake

JamisonParker

I chronicled the days you made me want to live Memorize the way that it felt and then I turned it into this ki ss

Tonight I'm wearing my best smile and hope to make me worth you r while

I'll be the best mistake you'll ever make

From the lack of sleep and the bloodshot eyes
To the nervous kiss and the butterflies
Does this make any sense at all
She said, she said

We're not sleeping, and I'm not breathing If this means anything at all I won't let you leave me anymore

If this holds insignificance, I'll have the hearse follow the a mbulance

No medicine exists to make my lungs work again

Let's shake and burn, like an addict My hearings dead, only static If I said your smiles all that mattered Would you save my life

We're not sleeping, and I'm not breathing If this means anything at all Don't let me leave you anymore [4x]

Don't let me leave you anymore
