River

Jana Kirschner

I was running from the traffic jam inside my head I close my eyes for a little while Drove a Cadillac I spread my wings And leave beneath the words That have been said There I am up in the clouds Free of the past

Take me to the river
When blue turn yellow and green
In the shade lay down by the water
Just you and me
Take me to the river
I don't need the lights of Paris and Rome
Take me down to the water
Carry me home...

I left friends without note I hope they will understand I'm gonna let them go today Start up a new band

I wrote a song
I made a wish
I had a little fun
Here in the clouds
All my gravity
Can't bring me down...
