

Shine

Jana Kirschner

I wanna love you everyday
Seems to me you don't feel that way
I wanna kiss you, just to be sure
That your love is real
Not some kind of dream anymore

When the stars begin to shine
No cheap romance no candle light
When the stars begin to shine, shine, shine...
That's all I need to make you mine

First time I saw you
I knew we could be the real thing
Can't wait anymore
Just to tell you everything
I don't mind we're different
And your mamma said
It's gonna be a bad match boy
Cards never lie
This time I'm gonna beat them all

When the stars begin to shine...

Pour milk in my coffee
In the morning and then
Do the things only lovers can
Watching the clouds
And waiting for the rain
I wanna love you everyday
