

## Never Never Never

Jandek

Kill all that kind  
Kiss the bad disease  
Smother in the sulfur heat  
Freeze it, kill the pain  
Breed in sin eat you out  
Festering sores of crime  
You took several times  
What you gave I couldn't use  
Except in this lonesome way  
Which has to suit me now  
Listen never never never never  
And why I don't know  
But great yeah, really great
