What Can I Say, What Can I Sing

Jandek

What can I say what can I sing You always knew about everything What can I show what can I do Is it all for me, is it all for you Well I don't know, we'll have to see Everyone needs, 'cept you and me And then sometime I'm not so sure There'll never be another cure The early morning sun shines through And all my thoughts are shades of blue Oh I don't know, I'll have to go Oh I don't know the reason for I already left It's no surprise I saw it in your raining eyes Adrift a dream A time we spent Much more than that Forever was all that we meant
