

# Everything Almost

Jann Arden

There's a place I'm headin' for and an old familiar road  
There's a face that I adore, a body and a soul  
I've been away for far too long  
I've tried to make it all work out  
But all do is think of you  
And dream about the love we had

I wanna travel back in time  
To every place we've been  
Tennessee and Calgary and New York in the spring  
The way you make my head spin round  
The way you make my heart implode  
Your breathing was as sweet as sound  
I think that I will never know

There's a place I'm runnin' to, it's just beyond the hill  
In my mind, it's never changed, I doubt it ever will  
And everything we had was almost  
Everything I ever wanted  
And now it seems that I was missing out  
On you and what was meant to happen

There's a place I'm headin' for and an old familiar road  
There's a face that I adore, a body and a soul  
I've been away for far too long  
I've tried to make it all work out  
But all do is think of you  
And dream about the love we had
