

Remember when we had them all on the run
And the night we saw the midnight sun
Remember saying things like we'll sleep when we're dead
And thinking this feeling was never going to end

Remember when we had them all on the run
And the night we saw the midnight sun
Remember saying things like we'll sleep when we're dead
And thinking this feeling was never going to end

Remember that night you were already in bed
Said fuck it, got up to drink with me instead

Give me that naked new skin rush
(Give me younger us)
Give me that you and me to the grave trust
(Give me younger us)
Give me my girls learning love, wild and free
(Give me younger us)
Give me my boys and I swimming through the streets
(Give me younger us)

Give me that night you were already in bed
Said fuck it, got up to drink with me instead

Give me that naked new skin rush
(Give me younger us)
Give me that you and me to the grave trust
(Give me younger us)
Give me my girls learning love, wild and free
(Give me younger us)
Give me my boys and I swimming through the streets
(Give me younger us)

Give me that night you were already in bed
Said fuck it, got up to drink with me instead
