

# Quantum Theory

Jarvis Cocker

Last night I slipped through time to a parallel dimension  
You were alive and happy

Our children played in trees  
Were strong and wise  
And knew no fear

We watched them play together

Somewhere everyone is happy  
Somewhere fish do not have bones  
Somewhere gravity cannot reach us any more  
Somewhere you are not alone

This morning, when I awoke  
God was dead but I lived on  
I cannot move  
But I am free  
I found the source of gravity

Somewhere everyone is happy  
Somewhere fish do not have bones  
Somewhere gravity cannot reach us any more  
Somewhere you are not alone  
Somewhere in a parallel dimension  
Happening now but not within your sight  
The force that binds the universe together  
Everything is gonna be alright

[Repeat: x7]  
Everything is gonna be alright
