

Quantum Theory

Jarvis Cocker

Last night I slipped through time to a parallel dimension
You were alive and happy

Our children played in trees
Were strong and wise
And knew no fear

We watched them play together

Somewhere everyone is happy
Somewhere fish do not have bones
Somewhere gravity cannot reach us any more
Somewhere you are not alone

This morning, when I awoke
God was dead but I lived on
I cannot move
But I am free
I found the source of gravity

Somewhere everyone is happy
Somewhere fish do not have bones
Somewhere gravity cannot reach us any more
Somewhere you are not alone
Somewhere in a parallel dimension
Happening now but not within your sight
The force that binds the universe together
Everything is gonna be alright

[Repeat: x7]
Everything is gonna be alright
