

# One We Won't Forget

Jason Aldean

Got the visor down drivin' into the sunset  
Ain't come up on your dirt road turn yet  
This Chevrolet is 5 away  
Just enough time to burn half a cigarette  
Can't wait to see what's waitin' on me  
Behind that screen door I bet it'll be  
Somethin' I can't take my eyes off  
Somethin' you can't wait to show off  
Baby, this ain't no lay low kinda night I'm talkin' about  
When you get everything just the way you like it  
Come walkin' out we

Get these wheels rollin' down the road  
Find us a couple cold beers to hold  
Let that moonlight kiss your skin  
Like I'm about to do again and again  
Don't matter where we set the party down  
Underneath the stars or the lights of town  
In a car in a bar girl when this night ends  
Let's make it one of the ones we won't forget

You been soakin' up that sunshine all day  
Sendin' some hot little pictures my way  
Soakin' wet gettin' in my head  
Now you're in that dress and girl I can't wait to  
Take you out, spin you around  
Find somewhere to lay you down  
But the first thing we gotta do right now is

Get these wheels rollin' down the road  
Find us a couple cold beers to hold  
Let that moonlight kiss your skin  
Like I'm about to do again and again  
Don't matter where we set the party down  
Underneath the stars or the lights of town  
In a car in a bar girl when this night ends  
Let's make it one of the ones we won't forget

Baby, this ain't no lay low kinda night I'm talkin' about  
It's a missin' you all day kinda thing gotta make every second count when we

Get these wheels rollin' down the road  
Find us a couple cold beers to hold  
Let that moonlight kiss your skin  
Like I'm about to do again and again  
Don't matter where we set the party down  
Underneath the stars or the lights of town  
In a car in a bar girl when this night ends  
Let's make it one of the ones we won't forget  
Yeah, one we won't forget  
Yeah
