

# Set It Off

Jason Aldean

Got a warm breeze blowing, cool creek flowing  
Full moon high, got a good thing going  
Got some old school tracks tweaking on the speakers  
What we got between us is burning like a fever  
It's a damn good night, firefly light, bourbon on ice  
Just waiting on you and I to

Set it off, set it off  
A little kiss is all it takes, all it takes to get me lit  
And I'll be like a bottle rocket flying  
Every move striking like lighting  
That 5 alarm touch in your fingertips  
Turns an ordinary night into a night like this  
Let's set it off, set it off  
Set it off

We were hanging on 8, now we're tipping on 10  
You turn it up a little then you turn it up again  
The curves on you got my body on cruise  
You're 90 proof smooth but girl them baby blues really

Set it off, set it off  
A little kiss is all it takes, all it takes to get me lit  
And I'll be like a bottle rocket flying  
Every move striking like lighting  
That 5 alarm touch in your fingertips  
Turns an ordinary night into a night like this  
Let's set it off, set it off  
Set it off

On your mark, get set, go  
Give the stars a little rock show  
Set fire to this back road  
Make midnight into smoke

Set it off, set it off  
A little kiss is all it takes, all it takes to get me lit  
And I'll be like a bottle rocket flying  
Every move striking like lighting  
That 5 alarm touch in your fingertips  
Turns an ordinary night into a night like this  
Let's set it off, set it off  
Set it off

Set it off  
Yeah girl, set it off
