

While We Were Waiting

Jason Blaine

Someone saw the Grand Canyon
Someone walked on the moon
Someone just did something they said that they would always do
World keeps turning, the sun goes up and down
While the gettin was good, someone got it done right now

While we were waiting
I bet a million dreams came true
While we were waiting, staying, hesitating
It coulda been me and you
Living for the moment
Loving life a little more
It's what I've been waiting for

I wanna hold you close, wanna show you what loves about
I want you to know so I'm givin you my solemn vow
You've been burnt before and you're afraid to make the same mis
take
Oh, the best things in life, they all take a little faith

While we were waiting
I bet a million dreams came true
While we were waiting, staying, hesitating
It coulda been me and you
Living for the moment
Loving life a little more
It's what I've been waiting for

They say good things come to those who wait (those who wait)
But before it's too late, before it's too late

While we were waiting
I bet a million dreams came true
While we were waiting, staying, hesitating
It coulda been me and you
Living in the moment
Loving life a little more
So what are we waiting for?
What are we waiting for?

Living for the moment,
Loving life a little more...
While we were waiting...
Living for the moment,
Loving life a little more...
