

# Love Would Find a Way

Jason Donovan

I lost my heart  
in her blue eyes  
Don't ask me how  
Don't analyse

But I was slowly captured by her spell  
When she didn't wanna know me  
I never gave up hoping

Love would find a way  
Love would save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way

Across the room  
I caught her eye  
and time stood still  
Don't ask me why

And I was surely captured by her smile  
but what good did it do me  
'cause she just looked right through me

Love would find a way  
Love would save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way

Love would find a way  
Love would save the day, save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way

And I was only waiting patiently  
'til the day you came up to me  
and said you thought you knew me

Love would find a way  
Love would save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way

Love would find a way  
Love would save the day, save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way

Love would find a way  
Love would save the day, save the day  
Nothing in the world  
would ever stand in it's way  
I believe love would find a way
