

Question of Pride

Jason Donovan

Don't let your pride
stop you from saying sorry
Remember, in time
there's two sides to every story
If you're missing me now, if you're missing me now
don't be afraid to show it

Make up your mind
'cause my love won't wait forever
This is one of those times
that we need to be together
If you're sorry now, if you're sorry now
don't be afraid to show me

Never let a good love die
if it's a question of pride
Don't push your heart aside
if it's a question of pride

At moments like this
how well do we know each other
The truth of it is
that we should be close together
Come back to me, come back to me
You don't have to say you're sorry

Never let a good love die
if it's a question of pride
Don't push your heart aside
if it's a question of pride

Never let it burn inside
if it's a question of pride
Your heart should rule your mind
if it's a question of pride

If you're missing me now, if you're missing me now
don't be afraid to show me

Never let a good love die
if it's a question of pride
Don't push your heart aside
if it's a question of pride

Never let it burn inside
if it's a question of pride
Your heart should rule your mind
if it's a question of pride
