Shine

Jason Lancaster

We have to walk, I know it hurts
But we can take our time cause it gets worse
Cause this world's mean, but count on me
And I'll be every little thing that you need me to be
Cause I will never change
And I will stay like this forever if you stay with me

Cause baby if you fall then I will catch you
I'm singing if you're broken I will fix you
Tell me but you already know
Not everything that glitters is gold
But I will shine for you

And you say the rain is just too much today
The skies should open up, not be this fray
Cause the clouds up there fill begging eyes
And it is company of lies who I just realized
You could count our days, but you haven't been afraid

Cause baby if you fall then I will catch you
I'm singing if you're broken I will fix you
Tell me would you already know
Not everything that glitters is gold
Together we can find a way through anything
Oh yeah, I could always, you're my promise ring
Tell me would you already know
Not everything that glitters is gold

Cause all you need to know
Is how you make me glow
But never when you're gone
So take me by the hand
Together we can stand
With what we're standing on
Is something that we've made
When times we were afraid of never moving on
But I know that I will always find you
Know that I will always find you

Cause baby if you fall then I will catch you
I'm singing if you're broken I will fix you
Tell me would you already know
Not everything that glitters is gold
Together we can find a way through anything
Oh yeah, I could always, you're my promise ring
Tell me would you already know
Not everything that glitters is gold
But I will shine for you
Yeah I will shine for you

I will shine for you
