

Let's See What The Night Can Do

Jason Mraz

Let's drive
Out to the sound at midnight
And dance in the dust of our headlights
And score some good seats for the sunrise
And get dressed up
In clothes we don't mind getting messed up
There's no one will know how to get us
We don't need a map we'll just drive, drive, drive

I wanna get lost with you
And hide out, out under the light of the moon
I wanna get lost with you
And see what it's like to spend the whole night with you, just you
With you, just you

We could head north
Over the oceans of turquoise
Where after a while, there'll be no noise
Except for the sound of our heart beat beating on
And we'll stand in a candid alone
Singing our favorite songs
And wait for the words to return in the echo (echo echo echo...)

I wanna get lost with you
And hide out, out under the light of the moon
I wanna get lost with you
And see what it's like to spend the whole night with you, just you
With you, just you
With you, just you
With you, just you

And I...
I wanna get lost...

Let's see what the night can do
Let's see what the night can do
Let's see what the night can do
I wanna get lost with you
Let's see what the night can do
Let's see what the night can do
Let's see what the night can do
I wanna get lost...
Let's see what the night can do
Let's see what our hearts wanna do
I wanna know what it's like to spend a whole night with you, just you
With you, just you
With you, just you
With you...
