

Will you be there

Jeanette

Will you be there when the fire turns ardour
Will you be there when the fire turns ardour
'cause it is more than a flame of the night
will you be there when the sun is goin' down for good
will you take care that it's alright

My friends and I were in a party mood
'cause we were sick of all that solitude
I saw you first down in your favourite club
bought you a drink and showed you what I've got
and you loved me till I cried

Will you be there when the fire turns ardour
'cause it is more than a flame of the night
will you be there when the sun is going down for good
will you take care that it's alright

I'm so afraid that you will leave again
my soul was searching for a suchlike man
a one-night-stand was what I had in mind
now my emotions give me difference signs
will you hold me when I cry

Will you be there when the fire turns ardour
'cause it is more than a flame of the night
will you be there when the sun is going down for good
will you take care that it's alright

Will you be there when the fire turns ardour
will you be there when the fire turns ardour
(more than a flame of the night)
Will you be there when the fire turn ardour
('cause it is more than a flame of the night) baby
will you be there when the sun is going down for good
will you take care that it's alright

Will you be there when the fire turns ardour
'cause it is more than a flame of the night
will you be there when the sun is going down for good
will you take care that... will you take care that
will you take care that... it's alright
