

# To Be With You

Jeff Black

I may be borderline  
But all joy is mine  
Anytime I choose  
The last couple of years though  
I've had my share of tears  
And found a lot to lose  
But the blues can't last  
Too long time moves too fast  
And leaves the past behind  
Here in my reverie  
Sweet memories  
Of what I'll find

Down in my easy chair  
I've got you there  
To pilot me straight through  
You show me what it means  
Through these crazy dreams  
To be with you

Take a look in here  
I have no fear I'm flying high above  
These gridlock streets  
Where the horizon meets  
This timeless love  
That I've forever known  
But only as of late I've sown  
I guess what they say is true  
We all have a destiny  
And the one for me is  
To be with you

When the moon is down  
And the sky is low  
And a little earthquake shakes a domino
