Fast Buck Freddie

Jefferson Starship

He said hold a dollar bill up to the mirror And I'll show you something funny It's only a fast buck, but It's so hard to make that kind of money.

Now it's hard to get serious when the joker Is laughing And by now the joker is wild It's hard to keep laughing when a rich man's Reflection Looks like a gun that's gonna smile What's going on, I ask you What's going on, Can you see? What's going on, I ask you and Who's coming on, is it you or me?

Coming on while it's still soft and warm Burn it dry before the fiery storm Sing it now while you still have a song Grab on now while you're still feeling strong.

How long, how long would you like it How long, how long will it be How long, how long can we take it? How long before we take it back, you and me Think fast.

I was thinking that I should be singing along Think fast I think he's coming thru Think fast, he thinks he's running you I was thinking that I should be singing along Think fast, he thinks he's coming in Think fast, I think he's wearing thin I was thinking that I should be singing along Think fast, he's taking all your time Think fast, you know he's out of line But who cares, you know you can, you will, you Know you can.

Sing it now while you still Sing it now while you still Sing it now while you still have a song.
