

I'm Waiting

Jennifer Lopez

You're afraid,
but give it time
There's gotta be something you like
Love letters,
but no replies
Boy you've gotta know what you want

From the way you look at me
Friends checking me (Oh!)
Always whispering
Never confront me (Uhhh)
Think that I'm gonna let you know
That's no time for playing no more

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting

It's okay,
don't be shy
Cause you might find love in the first try
Now you know I can't read your mind
You gotta let me know what you want

From the way you look at me
Friends checking me (Friends checking me)
Always whispering
Never confront me (Confront me)
Think that I'm gonna let you know
That's no time for playing no more

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting

I don't know why you would have to hide the way you feel
Listen to your heart and don't deny that this is real
You know you really wanna be here in my arms
Holding me
So tell that you want me like I want you
(What you gonna do?)

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting

Even though you got me wondering
And you need to tell me something
How you feel about me?
And if this love is ever gonna be
I'm waiting
