

Kiss Away From Heaven

Jennifer Love Hewitt

If you believe in what's meant to be
And you listen to your heart...
My love will always find you
Wherever you are...

Last night I saw you walkin'
Through a dream that filled my head
I felt the strength of my desires
'Til the sun spilled down all across my bed
I opened my eyes and you were gone
But this vision of you still lingers on
Oh, how it feels so real to me...

If you believe in what's meant to be
And you listen to your heart
My love will always find you,
Wherever you are...
You're just a kiss,
A kiss away from heaven

I'd know your face in an instant
I guess you call it deja-vu
Whatever brought us together
keeps me in your arms, so close to you
With every touch I lose control
I'm burning inside, can't let you go
This passion's a fire inside of me...
Yeah, yeah, yeah...

If you believe in what's meant to be
And you listen to your heart
My love will always find you,
Wherever you are...
You're just a kiss,
A kiss away from heaven

Baby, it's destiny
Now and forever...
A love that defines all space and time
A love that makes ever joy

If you believe in what's meant to be
And you listen to your heart
My love will always find you,
Wherever you are...

If you believe in what's meant to be
And you listen to your heart
My love will always find you,
Wherever you are...
You're just a kiss,
A kiss away from heaven...

Baby, kiss me...
