

Angel

Jennifer Rush

Though you've heard this one before
Know love can be unkind
Don't believe the words anymore
No I'm just passing time
But forever might not be long enough
For you to ever understand

If you want my love tonight
There's a way we know to survive
'Cause you could use an angel
Who knows what's on your mind

There's this part that never leaves me
Working through my mind
Tell me was it all a waste of time
Even though it's gone, gone
Every word is coming straight from this heart
There is one thing you should know

If you want my love tonight
There's a way we know to survive
'Cause you could use an angel
Who knows what's on your mind

Now that you're on your own
I'm wondering
Does the image bring my name
Have you finally realized
There's somewhere you can go

If you want my love tonight
There's a way we know to survive
'Cause you could use an angel
Who knows what's on your mind

If you want my love I could be that Angel
Who knows what's on your mind
If you want my love I could be that Angel
Who knows what's on your mind
