

# Dream Awake

Jennifer Rush

Ooooh ooh no

Saw you alone in the shade of the night,  
A distant reflection I caught in my eye  
Is this real?  
Cause I feel, like you're the one  
My heart's beatin' faster  
You're taking my air  
I'm drowning, I'm closer (?)  
As we start to dance  
Amor, I feel lost in your smile  
Many times but not this way before

Wont you stay (stay)  
And hold me in your arms forever? (ever)  
Don't want this night to fade away (fade away)  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.  
We shine brighter than the stars together  
This night'll never turn to day  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.

A moment (?) of magic I just cannot place  
Feels I'm asleep the first time we embraced  
Tell me, have we, been here before?  
Now that I got you, I wont let you go.  
Wont wake up tomorrow and find I'm alone  
Now you're here  
It's so clear  
My dreams become reality.

Wont you stay (stay)  
And hold me in your arms forever? (ever)  
Don't want this night to fade away (away)  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.  
We shine brighter than the stars together  
This night'll never turn to day  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.

See, it's my imagination running wild  
But I pinch myself to see if I'm right  
Is this just a fantasy or am I just make believin'  
I'm awake, why am I dreaming?

Wont you stay (stay)  
And hold me in your arms forever? (ever)  
Don't want this night to fade away (fade away)  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.  
We shine brighter than the stars together  
This night'll never turn to day  
I thought my eyes were closed but I,  
I'm in a dream awake, I'm in a dream awake.

Wont you hold me in your arms forever?  
Dream awake, dream awake  
But I,  
Oh  
I'm gona shine, shine, shine  
Stars together  
Dream awake  
Dream awake.  
\*fade out\*
