Way Down Deep

Jennifer Warnes

Way down, way way down Way way down deep You've got me way down, way way down Way way down deep

You're got me way down, way down deep I wander with you in my sleep I'm way down, way way down Way way down deep

It came to me this morning I was walking down the street Was like my soul could taste you And God, you tasted sweet

Finally I can breathe again Finally I can speak I've got you in the glory place I've got you way down deep

I've got you way down, way way down Way way down deep You're got me way down, way way down Way way down deep

You're got me way down, way way down I wander with you in my sleep I'm way down, way way down Way way down deep

It's a funny feeling But I cannot say I mind I know that I'm dealing with A love that's far from blind

I see every single angle I look before I leap And how else can I put it When you're got me way down deep

You've got me way down, way way down Way way down deep You've got me way down, way way down Way way down deep

You've got me way down, way down deep I wander with you in my sleep I'm way down, way way down Way way down deep

Don't matter what we gave away Was nothing we could keep Don't matter what we gave away You know that talk is cheap

Forgive me if I hate you You're a liar and a thief But I've got you in the glory place I got you way down deep

You've got me way down, way way down Way way down deep You've got me way down, way way down Way way down deep

You've got me way down, way down deep I wander with you in my sleep I'm way down, way way down Way way down deep

Don't matter if the road is long Don't matter if it's steep Don't matter if the moon goes out And darkness is complete

Don't matter if we lose our way I know we're gonna meet I've got you in the glory place I've got you way down deep

You've got me way down, way way down Way way down deep You've got me way down, way way down Way way down deep

You've got me way down, way down deep I wander with you in my sleep I'm way down, way way down Way way down deep
