

Head Underwater

Jenny Lewis

I've been wearing all black
Since the day it started
When I started to look back
Cause my mind is departed

I love to say what's in my mind
Like you used to
I can be what you want me to be

I keep my head under water
I see different what's happening
I want you to know how I feel
But she got me in

I'll never be alone
There are some words to say
Open my eyes, take me to the place I know
Yes I want you
Everybody knows it

What if I told you I need you?
Down to the valley
But you don't know that
And now you feed it
That's when I realize

I want you
Everybody knows it
I'm glad

There's something around you
Everybody knows it
Yes, I'm glad

I keep my head under water
I see different what's happening
I want you to know how I feel
But she got me in
