

## Precious Moments

Jermaine Jackson

I think about the time we first met  
I was taken by surprise when I saw the gleam of love in your eyes  
And then you smiled at me with ecstasy  
And you softly stole my heart  
What could I do but fall in love with you  
And nothing can keep us apart

Precious are moments that we share  
I'll run away with you - go anywhere  
Cause where I want to be is wrapped around your heart  
The world may be against the things we do  
I forget about the world when I'm with you  
My heart is full of love when you walk by my side

Now you're telling me that you're leaving  
I wonder if you'll ever return to me  
All I would have is the memories and photographs of you  
And, a smile or two that soon will fade away  
But we must hold on right this wrong  
And make it like yesterday

Precious are moments that we share  
I'll run away with you - go anywhere  
Cause where I want to be is wrapped around your heart  
The world may be against the things we do  
I forget about the world when I'm with you  
My heart is full of love when you walk by my side

I'm in this world  
Lost without you  
I've never known love so true
