

She Still Comes Around (To Love What's Left Of Me)

Jerry Lee Lewis

I know I'm not a perfect husband although I'd like to be
But payday nights and those painted women they do strange things to me
But then when the party's over and the good is all she sees
Though I let her down she still comes around just to love what's left of me

Six days out of seven I work hard at doing right
But believe me you could set your watch on any Friday night
But then I'm lucky she understands and the fool that lives in me
Though I let her down she still comes around to love what's left of me

The way I'm living it's a wonder she can take it
But that woman she's got a heart of gold it's justing me to break it
I know I don't deserve her but I'm thankful as can be
And though I let her down she still comes around just to love what's left of me
And though I let her down she still comes around just to love what's left of me
