

# Long Gone

Jerry Reed

Oh well it's long gone long gone you got my baby and you're long gone  
But I'll be hangin' around cause I know you're gonna put her down  
And she'll need someone that's true when she wakes up one day  
And find you long gone long gone

You just wandered into town  
You took her and you started messin' around with my baby  
You stole her heart cause she ain't used to your kind  
With your fancy clothes and uptown style  
It didn't take but a little while to get your way  
Cause your pretty little lies she couldn't see behind

And so it's long gone long gone you got my baby and you're long gone...

The man in me would like to fight to take you down by the river tonight  
And change your way but that would make her hate the sight of me  
So there's nothing left for me to do but stand and watch while the likes of you  
Hurt the girl I love while she's too much in love to even see

Oh yes it's long gone long gone you got my baby and you're long gone...  
Long gone long gone long gone
