

Imagination

Jes

Ooooo (x16)

I can tell in your eyes exactly where you go
'Cause I have been to every distant constellation
To see you again

In the world of my mind
There's nothing I wouldn't do
To cast away

I know it's like a trip for me too far
Moving forward, faster, into my imagination
Let it run, away with me
I know your love is perfect like the stars
When we're together, here in my imagination
Let it run, away with me, away with me, away with me (fade)

With every thought
The journey begins again
