

# The Lost Sky

Jesca Hoop

I walk the dark star, the lost sky  
Searching for your signal, receive mine  
I called you cold and our tears became laughter  
Happy ever after

Out of our secrets, we built a home  
Confide and fortify, blood, bone  
A love like I was comes 'round once in a lifetime  
Sending you a lifeline

The bitter burn of a signal run cold  
You became the dark star and left me all alone  
A love like I was comes 'round once in a lifetime  
Sending you a lifeline

The bitter burn of a signal run cold  
You became the dark star and left me all alone  
A love like I was comes 'round once in a lifetime  
Sending you a lifeline

And when we said the words 'I love you'  
I said them 'cause they are true  
Why would you say those words to me  
If you could not follow through?  
Go wash your mouth out, child

I walk the dark star, the lost sky  
Searching for your signal, receive mine  
I called you cold and our tears became laughter  
Happy ever after

Out of our secrets, we built a home  
Confide and fortify, blood, bone
