Jessica Andrews

Where in the world did you come from seems like I looked up and there you were didn't think about it then but when I look back I believe now that miracles do occur

'Cause i can reach up and touch any star in the sky put my arms 'round the moon if I try never thought I could feel so much love in my life no I never thought I'd know how but I do now

Is this a dream
or are you real
I'm trying hard not to loose my cool
when you're kissing me
I just get so lost in the moment
I hope I'm not actin' like some kinda fool

'Cause i can reach up and touch any star in the sky put my arms 'round the moon if I try never thought I could feel so much love in my life no I never thought I'd know how but I do now

never had no one to miss me never had no one to kiss me like you never had no one to love me like you

I can reach up and touch any star in the sky put my arms 'round the moon if I try never thought I could feel so much love in my life no I never thought I'd know how but I do now
